ITEC 362
Create HTML Website

This assignment is creating your rough draft of three pages of your final website. This rough draft should include the following:

Root folder named "Last name_Final Website" (5 pts)
Subfolders that organize images and other files (5 pts)

Home - named index.html (20 Pts)

1. Create an engaging home page that invites visitors to explore the rest of the site.
   Your home page should include the following:
   a. Basic structure including
      i. Header, main, footer
   b. HTML containers
      i. In addition to the basic structure, include three containers **(see zyBooks 3.1.1)**
   c. Include the head section
   d. Main navigation using an unordered list
   e. Header logo/website name

Second Page (20 pts)

2. Create a second page that incorporates a table and other content
   a. Include A and B from page 1
   b. Include table header, footer, and body areas
   c. Use colspan and/or rowspan
   d. Include a caption

Third Page (20 pts)

3. Create a third page that incorporates a form and other content
   a. Include A and B from page 1
   b. Include three different input types and a submit button
   c. Use a few widgets

Include the following components somewhere in your three pages

- Basic HTML tags (5 pts)
